**DETAILED ACTION**

**Allowable Subject Matter**

Claims 1-15 are allowed.

**EXAMINERS REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior does not anticipate nor render obvious the combination set forth in the independent claims, and specifically does not show a system for switching a communication mode of a detachable pad refrigerator with a controller that controls a communication module to automatically switch the communication mode of the refrigerator with a client pad between a wired communication mode and a wireless communication mode based upon whether the client pad is attached to the refrigerator. Sharood et al. (US 6453687) teach a refrigeration system with a universal controller 110 that communicates with a control server 100 by wired communication mode (column 6 lines 55-65) and is capable of wireless communication mode via the wireless radio frequency communications network 4. Sharood et al. fail to teach the universal controller controls the communication module to automatically switch between a wired and wireless communication mode.

**RESPONSE TO ARGUMENTS**

Applicant's submission of Declaration under 37 C.F.R. 1.132 that sets forth common ownership of the subject matter of claims 1-15 has been accepted and does

overcome the prior art rejections of Roh et al. (Korean Laid-open Patent Publication No. 10-2002-0047618) in view of Liebenow et al. (US 6131136).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
